# Minimus Advent Calendar

I've provided a painted version and a line drawing version (so you can colour your own). Print the pages you need onto white card.

If you're using the line drawing version, colour in the window page before cutting anything.

Cut along top, right and bottom sides of each numbered window, leaving the left side as the hinge. Use a craft knife and cutting mat.

Turn the cut window side face down to apply either a glue stick or strips of double sided tape in between the windows and around the edges. Avoid the window openings!

Stick the window page to the page of little colour pictures.

I hope you have fun making and using your calendar!
