

# Cutting a mouse snowflake

Print the template onto white or coloured A4 paper. Cut around the outside of the circle, then fold it in half along one of the lines. Fold the semicircle carefully into three along the lines, making sure that the mouse drawing is on top. Cut out the mouse and cheese, but don't cut through the bits of the design that touch the folds. Use sharp scissors - small blades make it easier. Unfold your mouseflake gently.
