

Flavius' Roman office (tablinum)

Colour, cut out and stick!

Print both pages on white card. If you don't have printer card, you could print on paper and glue it to thin card with a glue stick (white glue will make the paper crinkle). Heavy black lines are for cutting; dotted lines are for folding. Use a ruler and score the folds. Grey areas are for sticking pieces together. Fold the walls up and stick the corner piece behind the window wall. NB desk and stool legs may need bracing with extra card.

Cupboard (armarium) Cut the H shape carefully with a craft knife. Fold along dotted lines. Stick the left flap to the floor and the right flap to the wall above the shelves full of paperwork.

Shelf: (pegma) stick the two tabs to the wall, under the jug, wood side up.

Shield (scutum) fold the two side flaps and the curved flap. Snip the curved flap along the lines and stick them to the shape on the floor. Stick the side flaps to the wall, partly covering Flavius' cloak.

Desk (mensa) fold on the lines and stick the feet to the floor. Make sure the open tablet is facing the back corner of the room.

Wolfskin rug Stick it to the floor in front of the desk

Stool: (sellula) legs and seat

Fold the sides of the seat along the dotted lines. Carefully snip all the little lines. Bend the seat into a shape like this 

Glue the row of little tabs on one side of the seat, and stick it to one of the leg pieces, curving it to fit the seat shape. Do the same with the other side. Fold leg tabs inward, and stick to the floor behind desk.
